

NE Ohio Safety Expo

Thursday, Oct. 3, 2024

Conference goal

The annual event is proudly presented by the Ohio Bureau of Workers' Compensation's (BWC) Region 1 office and the American Society of Safety Professionals – Northern Ohio Chapter. The goal is to provide all employer types with valuable and effective information about safety and health programs. With 20 sessions, there's something for everyone. Session topics include fall protection, OSHA recordkeeping, workers' compensation, and more. Also, don't forget to check out the exhibitor area, where over 50 safety and health exhibitors will show off their goods and services!

Location

Eastwood Event Centre
5577 Youngstown Warren Rd.
Niles, Ohio 44446
330-989-7225

Registration

Educational sessions have a limited number of seats, so please register and pre-pay by Friday, Sept. 27, 2024. On-site registration is welcome for an additional \$10 but we cannot guarantee there will be space available in all the sessions.

Register online

Conference times

Registration: 8 - 9 a.m.
Conference: 9 a.m. – 4 p.m.
Exhibit area: 8 a.m. – 2:45 p.m.

Conference price

Attendees: \$40. Lunch is included in the registration fee. Exhibitors: \$250, which includes an exhibit table. Spaces are limited.

Educational credits

- Safety council members may earn one external credit for BWC's Safety Council Rebate Program. A certificate will be sent to the email address used when registering. Maximum – one external training certificate per company.
- Attending two sessions fulfills the two-hour training requirement for BWC's Group-Experience-Rating Program or Group-Retrospective-Rating Program.

For questions on educational sessions or exhibitors contact Philip Dwyer at 330-610-9128 or email at philip.d.1@bwc.ohio.gov

9 - 10 a.m.

Active shooter survival

Tom Miles, On Demand Occupational Medicine

In today's unpredictable world, it's essential to be prepared for emergencies, including the rare but critical scenario of an active shooter situation. Join us for a comprehensive and potentially life-saving training session on "Active Shooter Survival." This training is designed to equip participants with the knowledge and skills needed to survive in the event of an active shooter incident.

Whole person health: New mental health resources

Robin Kish, ActiveHealth / Better You, Better Ohio!

Physical Health, Mental Health, and Whole Person Health: We will cover new mental health resources and fresh content you can take back to your workplace for your workforce. Better You, Better Ohio!® is administered by ActiveHealth for the Ohio BWC for small employers in high-risk industries.

Leveraging stories that impacts change in behavior

Kevin D. Mowers, Crestcom- NE Ohio

Messages delivered as stories are significantly more memorable than just facts. As leaders, we are constantly struggling to find ways to connect, inspire, and create change with our people. We rely on emails, texts, or signs all with the hope that they simply will "read" the information. During this conversation, we will discuss the importance of storytelling as a leadership skill and how leveraging a story can make an impact on your organization.

OSHA's Silica Standard

Kent J. Crytzer, CSP, Construction Employers Association

Understanding the Silica Standard for construction, specifically OSHA standard 1926.1153, is crucial for ensuring workplace safety and compliance. This presentation will cover the fundamental requirements of the Silica Standard, focusing on permissible exposure limits and necessary control measures. Attendees will learn effective strategies for managing and implementing the standard, including using appropriate engineering controls, work practices, and respiratory protection. Additionally, we will discuss inspection techniques to verify compliance, emphasizing the importance of regular monitoring and record-keeping. By understanding and adhering to these guidelines, construction professionals can achieve and maintain compliance with OSHA's silica regulations.

10:15 - 11:15 a.m.

Identifying and controlling health hazards at your facility and job site

Sarah Ghezzi, Ohio Bureau of Workers' Compensation, Office of Safety Services

Do you know what your employees are inhaling at work? Learn about the common processes that may result in hazardous chemical exposures to your employees. Processes covered will include spray painting, welding, metal fab/cutting, concrete cutting, sandblasting, and more. This session will also cover the basics of controlling these health hazards in the workplace using the hierarchy of controls. Best practices and OSHA requirements will be included in the presentation.

Stretching for the industrial athlete

Taylor Anderson, Safex

The topic will be stretching for workers in the industrial setting. This session will cover various types of stretching, examples of dynamic/static stretching, and implementing a stretch program at your site for pre-work and post-work.

10:15 - 11:15 a.m.

Psychologically safe work environment

Ruth Bowdish, On Demand Occupational Medicine

Today's employees are experiencing symptoms like disengagement, fatigue, burnout, and overall mental distress. On-the-job safety is everyone's responsibility but when we are filled with fear, anxiety, and a general distrust of our environment, how can employees be expected to speak up when a threat is detected? This training will provide participants with a comprehensive understanding of creating psychologically safe work environments as well as the consequences of toxic employees.

Rising safely: Innovations in fall protection and working at heights

Matthew Hohman, FallTech

Explore the exciting world of fall protection! From new technology to smarter designs, discover how the industry is making work at heights safer. Dive into programs promoting a safer workplace in our pursuit of zero falls.

11:30 a.m. - 12:30 p.m.

OSHA top 10

Howard Eberts, US DOL OSHA Cleveland

Mr. Eberts will present enforcement and injury stats found in both Construction and General Industries. He will explain what role OSHA plays in preventing injury and illnesses in northeast Ohio. He will cover other topics like national emphasis programs, local emphasis programs, and Cleveland's complaint process.

Mental Health Awareness in the workplace training

Regina Bond, ORB Consulting, LLC

Mental Health Awareness in the Workplace (MHA) Informational Program is designed to bring to the forefront of the workplace mindfulness about overwhelming numbers and types of mental health disorders and best practice ways to deal with challenges.

OSHA Recordkeeping

Brian Zachetti, Ohio Bureau of Workers' Compensation, Office of Safety Services

This session will examine OSHA Recordkeeping forms, general recording criteria, and specific situations that must be recorded on OSHA Injury & Illness Recordkeeping documents. The primary focus will be determining recordability to ensure accurate records are maintained. This session will also cover reporting requirements and electronic record submission.

Trenching and excavation

Bill Hocevar, The Great Lakes Construction Co.

Excavations, injuries, and fatalities continue to haunt the construction industry. In this session, learn the top hazards associated with these risks and how to eliminate them. Real-life scenarios will illustrate the importance of keeping your employees free from danger.

Lunch

1:30 - 2:30 p.m.

How to win friends & influence people (in safety)

Cari Gray, Ohio Bureau of Workers' Compensation, Office of Safety Services

A safety role is a sales role. You're continually selling safety to all levels in your organization. In this presentation, we'll identify who you must influence, and methods to get your safety message across. Set yourself up for success as we explore tried-and-true methods to win friends and influence people (in safety).

To test or not to test – a look at employer drug testing

Ruth Bowdish, On Demand Occupational Medicine

Employment drug testing has seen its highs and lows. Is it time to give up employment drug testing or is it more important than ever? This presentation examines current drug trends, the emergence of oral fluid testing, policy tips and tricks, and answers

1:30 - 2:30 p.m.

questions about the drugs you're testing for. We discuss creating a recovery-friendly environment and best practices when someone is under the influence on the job. Distinguish between different types of drug testing, including hair, urine, and oral.

BWC basics: How did BWC end up with a monopolistic system & how does it work?

Christine Williams, Ohio Bureau of Workers' Compensation, Office of Employer Services

This session covers Ohio's evolution as one of the four monopolistic states, as well as the basics of how rates are determined and the claim process.

Identifying electrical hazards in the workplace through assessments

Michael Kovacic, ES Squared Inc.

One of the root causes of workplace injuries and incidents is the failure to identify or recognize hazards that are present, or that could have been anticipated. A critical element of any effective safety and health program is a proactive, ongoing process to identify and assess such hazards. This session will address how to identify common electrical hazards through workplace assessments, including some of the tools to assist in those efforts.

2:45 - 3:45 p.m.

Lockout/Tagout: Controlling hazardous energy and your company program

Brian Zchetti, Ohio Bureau of Workers' Compensation, Office of Safety Services

This session will examine best practices surrounding the control of hazardous energy and how they may apply to your workplace. Topics of discussion will include machine-specific energy control procedures, minor servicing considerations, energy source evaluation, and employee training. This session will also provide instruction regarding requirements for energy isolation devices, group lockout requirements, and program development.

It takes more than a hardhat to keep a head safe: mental health for the workplace

Mandy McIntyre, Level Up Consultants

When you think about workplace hazards, physical risks are probably at the top of the list — an unprotected fall, an unmarked restricted zone, etc. But what about the dangers you can't see? This session will provide solid solutions and resources on the value of mental health initiatives to provide safer job sites, a more profitable business, and combat the labor shortage by helping to attract, engage, and retain your workforce.

Workplace compliance: What to look for in 2025!

Elizabeth A. Crosby, Schneider Smeltz Spieth Bell LLP

Managing the workforce becomes more and more complex with each passing law. From changes to the independent contractor relationship to outlawing non-compete agreements, it is more important than ever that Human Resource (HR) professionals stay on top of the changing HR landscape. This session will bring your "HR RADAR" into sync with current events.

Work zone safety-MUTCD/ANSI

Ryan Armstrong, US DOL OSHA Cleveland

Work Zone Safety for Highway Construction applies to workers engaged in construction, utility work, maintenance, or repair activities on any area of a highway. This session will define and discuss MUTCD/ANSI A10.47 and setting up a proper long term/intermediate/short traffic control zone under the MUTCD and ANSI standards.
